# Binocular craft

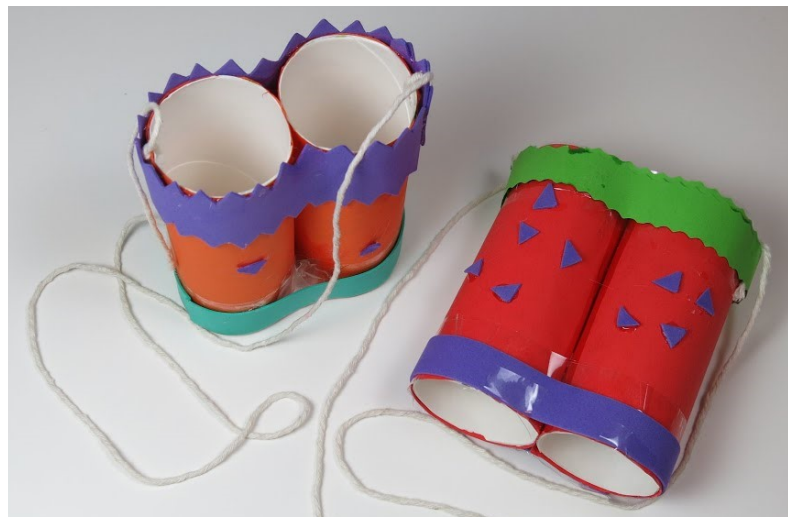

Directions: Follow the steps below to make a pair of binoculars using materials found at home. Use what you've made to help you look for birds in your backyard, at the park, or outside your window!

Step 1: Find two toilet paper tubes or cut a paper towel tube in half.

Step 2: Glue or tape the tubes together.

Optional: Wrap the tubes in construction paper or make fun designs with markers or paint! Attach a string using glue or a hole punch so you can wear them.

Step 3: Use your new binoculars!
