# Draw From Your Window

Here's a fun observation activity you can do inside your home! Grab your colored pencils, crayons, markers, or paint and create your own rendering of what you see outside your window. Find a nice spot by one of the windows in your home and observe any plants, animals, living, non-living, and man-made objects you see and capture them on your paper with your unique creative skills. Take a look below to see an example of what one of our naturalists sees outside her window!
