Nature in your hands

Leaf Printing

Leaf printing is a great way to create art with natural objects and to remember our summer leaves during the winter months!

Go out for a nature walk, collect any leaves you see on the ground that you like. Try to collect a variety of leaf shapes and sizes.

Paint a light layer on one side of the leaves with any color, press the painted side down on a blank piece of paper. Get creative and make any pattern or picture that would like!

Look back on your leaf printings during the winter months to relive the full trees and greenery of the summer!
