# Sculpting with Nature!

---

November is a wonderful time to get outside! Let's connect with nature this week through art. Take time to tap into your inner artist for this activity and let your creativity run free!

Let's sculpt with nature! Outside you can find an array of materials to use like rocks, sticks, leaves, sand, and anything else you find. We challenge you to make a nature sculpture creating anything you want! Keep in mind to respect plants that are living and areas where people recreate. See the pictures below for a few examples of what our staff have been creating outside!
