# Frog life cycle-with food!

Did you know that amphibians like frogs have a life cycle? Do you know what the frog life cycle looks like? Draw/label/or craft the frog life cycle. Once you're an expert, use your daily snack to create the frog life cycle out of food. Blueberries, carrots, pretzels, or grapes work great. This is the perfect excuse to play with your food because you're learning too!

Take inspiration from this edible frog life cycle that an Outdoor Adventures camper created!

Want to play more with your food? Learn about other animal life cycles and create those out of food too!
