# Winter Survival Scavenger Hunt

Many plants go dormant during winter, so it may seem like plants do not have much use during this time of year. However, winter plants help animals survive this tough season. Take a walk outside or at Baltimore Woods and try to find things that help animals survive the winter.

Something a Mouse  
Might Use in its Nest

Tree Buds

Shelf Fungi

A Bird Eating a  
Nut or Seed

Fallen Tree

A Squirrel Nest Up  
in a Tree

An Evergreen Tree

Pine Cone

A Hole in a Tree

After your outdoor adventure, write next to each winter plant related item whether it provides food, shelter, or both for a winter animal.
