

# Forest Food Chain

Take a look at the forest food chain below. Is a raccoon the only animal a fox eats? No! Cut out the plants, animals, and insects on the next page and glue them in the spots where they belong in the food chain.

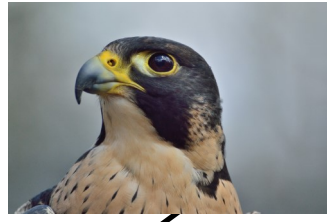

# City Food Web

Take a look at this city ecosystem, the peregrine falcon is the top predator. Create a food web out of these pictures. Draw a line from the falcon to what it might eat, then draw a line to what that animal might eat, keep going until everything is connected. The first line is already done for you.

Peregrine Falcon

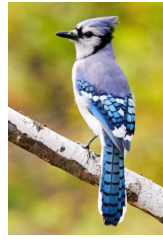

Acorn

Grasshopper

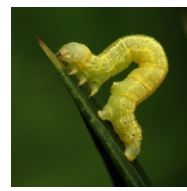

Blue Jay

Leaf

Seeds

Inch worm

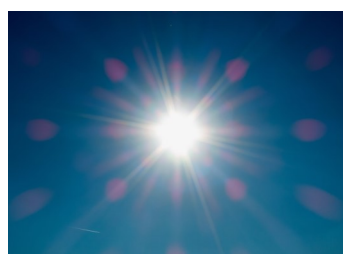

Ground Beetle

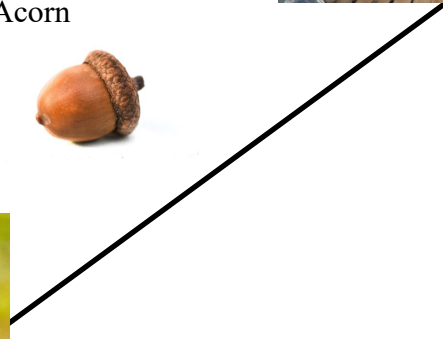

Rock Pigeon

Grass

Sun

# Forest Food Chain

Cut out these pictures and glue them into the right spots in the forest food chain.

Opossum

Ant

Leaf

Acorn

Grasshopper

Squirrel
