Fungi Color Scavenger Hunt

There is fungus among us! Fungi comes in all shapes, sizes, and colors. You may not always be able to see the fungus around us but they are always there, you may just need to look closer.

For this scavenger hunt go for a walk around your neighborhood or at Baltimore Woods and try to find as many fungi as you can. Can you find all of the colors of the rainbow in the fungus you see?

When you find a fungus try drawing it in a nature journal or take a picture of it. How many can you find?

Remember lichen is partly fungus so it counts in this scavenger hunt!

Here's a tip: Try looking shortly after it has rained, most fungi prefer moist conditions.
